

# Lessonly + SEISMIC

= **Connecting Sales Enablement & Training**

Lessonly is used to educate & empower sales teams through better training through one of the world's most intuitive software platforms.

## Import Lessons into Seismic

Sales reps using Seismic don't have to leave the platform in order to access their training content.

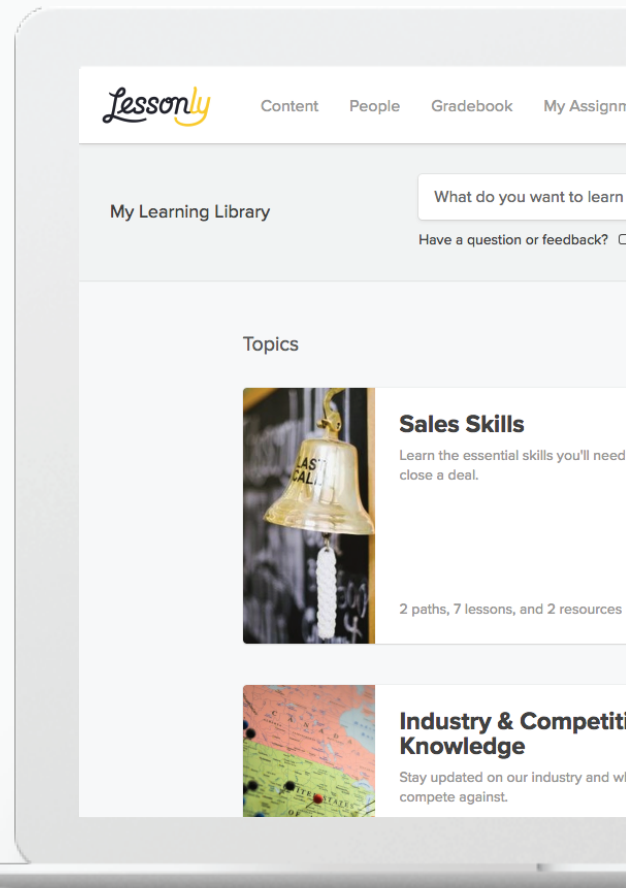

## Pair Marketing & Training Content

Admins can pair lessons alongside associated marketing collateral so the rep can have training + content in one central location.

## Lesson Tracking

Lesson usage is tracked - just like any other piece of content within Seismic - so leadership knows what's being used, when, and by whom.
